EDUCATION

Rice University

Houston, TX

Bachelor of Arts in Mathematical Economic Analysis and Finance

Expected May 2027

Minor: Financial Computation and Modeling

- **GPA:** 3.9/4.0
- **Relevant Coursework:** Quantitative Financial Analytics, Financial Derivatives, Advanced Econometrics, Financial Markets & Investments, Energy Economics, Advanced Corporate Finance, Data Visualization, Macroeconomics.
- **Teaching Assistant:** Introduction to Data Science, Marketing Analytics, Strategic Management.

WORK EXPERIENCE

Quantor Capital

Houston, TX

Quantitative Analyst Intern

October 2026 – Present

- Backtested Smart Beta investment strategies in Python, analyzing portfolio performance at a \$1B AUM hedge fund.
- Implemented futures overlay strategies to efficiently apply financial leverage across equity and fixed-income portfolios.
- Simulated portfolio tail risk via Monte Carlo to evaluate protective put hedges and optimize option cost efficiency.

BBVA (Banco Bilbao Vizcaya Argentaria)

New York City, NY

Equity Derivatives Trading Intern

May 2026 – August 2026

- Built a dividend pricing rule in Python/SQL (800+ stocks), synthesizing 2M+ Bloomberg & Totem div swap rows.
- Enhanced forward pricing by adjusting dividend forecasts via implied vol, cuts, and Dividend Risk Premium (DRP).
- Proxied implied dividend volatility using an annual 252-day rolling standard deviation of 1–3Y dividend swap prices.
- Quantified DRP by calculating realized vs. implied dividend spreads and scaling shifts to reflect market priced risk.

Main Street Capital Corporation

Houston, TX

Private Equity Analyst Intern

January 2026 – May 2026

- Analyzed \$8.7B+ AUM in middle-market private equity, building DCF, LBO, and other valuation models in Excel.
- Screened early-stage deals (350+ annually) via market research, NDA review, CIM analysis, and preliminary valuation.
- Pitched 3 early-stage deals to senior management, detailing investment rationale, deal structure, and multiples valuation.

Rice Business

Houston, TX

Undergraduate Research Assistant

August 2024 – January 2026

- Merged 50k+ observations of Russell 3000 firms in R, linking executive public-sector tenure to corporate misconduct.
- Ran linear and negative binomial regressions, finding a significant positive link between public tenure and misconduct.
- Applied industry (SIC) and year fixed effects with firm-clustered robust standard errors to correct heteroscedasticity.

PROJECTS

Efficient Frontiers & Systematic Risk: A Visualization of Modern Portfolio Theory

March 2025 – May 2025

- Awarded Best Visual (50+ entries) at the Rice Data Showcase for visualizing the Efficient Frontier, CML, and CAPM.
- Modeled 10k+ random portfolios and visualizing mean–variance trade-offs for Magnificent 7 returns (2021–2025).
- Calculated historical equity firm betas using linear regression on excess stock and market returns to visualize the SML.

Rice Energy Trading Group: WTI-Brent Crude Oil Basis Pitch

December 2025 – January 2026

- Recommended long Jan 2026 Brent and short WTI based on macro & geopolitical risks, rig counts, and inventory data.
- Forecasted weekly basis movements via a Lasso model on supply data, yielding \$35/bbl backtested P&L (2020–2025).
- Presented trade and model outputs to leadership & faculty; secured Refined Products Analyst role (40+ applicants).
